# WE ARE FROM AUSTRIA

## OUR FAMILY TREE HAS STRONG ROOTS.

LOCATION

## A MATTER OF TRUST

Our family has been connected to the natural element, wood, for more than 190 years. After all, our home town Weiz is located in the middle of green Styria, the province in Austria with the largest abundance of forests.

Just as our forests keep on growing, we also undergo continual development and growth.

With Dr. Nicola Weitzer, Wilfried Weitzer and Mag. Alexandra Decker-Weitzer is already the seventh Weitzer generation at the head of the family business. With great care, they continue the life work of their parents and grandparents.

- We perform all work processes by hand - from cutting the timber, to producing the parquet.
- Social responsibility is an integral part of our corporate policy, which is why we feel very strongly about ensuring that our personnel have jobs in Austria in the future as well.

# THE SECRET BEHIND THE VARIETY OF COLOURS

NATURAL MATERIALS  
AND TECHNIQUES.

## SECRET RECIPES:

The emergence of our colours and surfaces is an exciting process that involves many raw materials and extensive processes. Their interaction creates fascinating, trendy nuances. Here is a little insight into the generation of our colours.

## SMOKING

Smoking leads to a natural reaction in the oak and makes it darker. It lends a new, particularly noble character and reinforces the individual marking of each parquet board. Our fumed oak serves as the basis for applying colour oils that create trendy tones such as „oak coffee“.

## STEAMING

When steaming, the wood is exposed to intense water vapour for several days. This process enhances the natural colour nuances and ensures the striking radiance of woods such as nut.

## NATURAL OILS

For special colour-fastness and yellowing resistance we use the highest quality thistle, sunflower and soy-bean oils. They penetrate deep into the pores, nourish the wood fibres and keep them supple.

## NATURAL WAXES

Natural waxes in combination with oils give our parquet surfaces resistance to scratches and abrasions caused by hard and blunt objects. Here we use carnauba wax, obtained from the leaf surfaces of the carnauba palm, and candelilla wax, obtained from the leaves of the candelilla bush.

## MINERAL SALTS

Minerals hold an incredible variety of colours. Colour pigments are obtained by breaking and grinding them. The finer the pigment, the more intense is its colour rendering. A wide range of colours from brown to yellow, red and black, for example, iron oxide.

## WHERE ACTIONS MEET WORDS.

We listen to Mother Nature, and feel obliged to align our company with the environment. We invite you to follow our example!

- We source our raw material timber from certified, sustainably managed forestry. The vast majority of our timber originates from Austria, Croatia and Hungary, within 250 kilometres of reach to our factories.
- We are the first parquet manufacturer to have ceased using tropical hardwood timber for a number of years.
- Energy is a valuable resource. Our internal biomass power plant, photovoltaic systems and hydroelectric power plant allow us to produce not only environmentally friendly district heating but also eco-power. The energy produced in this sustainable manner provides power not only for Weitzer Parkett but also for more than half of the city of Weiz. This corresponds to a capacity of more than 2000 households.
- **We are a step ahead: Weitzer Parkett is the first and only manufacturer in the market to offer an overall solution for parquet flooring and adhesive that is free from plasticizers.**
